

To push beyond the boundaries of conformity
Is to create a life of endless possibilities
The further one explores expansive thought
The struggles of daily life begin to dissolve
The endeavor contributing to significant growth
Undermining society's attempt to ensnare the soul
Through an infinite array of deceptive means
Though unless spirit yearns to break free of its chains
Any breakthrough of a transformative nature
Will be limited in its capacity to influence aspects
Of the higher mind which directs the elemental
Components which in turn create the envisioned
Reality that one consciously seeks to create
